TECHNICAL SKILLS

Skills: Java, OpenGL, XML, GLSL, Python, C++, GML, HTML, CSS, Spanish and translations

PROFESSIONAL EXPERIENCE

Game Programmer at Pace-o-matic inc., Duluth, GA

May 2016 - Present

- Develop and maintain legally compliant Class II skill games, integrating gameplay, graphics, and audio systems in collaboration with cross-functional teams.
- Design and implement new bonus mechanics and gameplay systems with a focus on secure currency handling, state management, and data integrity.
- Architect reusable game systems and bonus frameworks used as templates across multiple titles, supporting full session recovery and state continuity.
- Optimize core game systems and resources for performance, stability, and reliability. Develop internal tools and utility systems to support development efficiency and debugging, improving workflow and reducing manual overhead.
- Designed and implemented a system-wide English-to-Spanish localization framework providing consistent multilingual support across all games.
- Translate and maintain critical in-game text and language localization assets.
- Act as lead developer on multiple game projects, managing concurrent development efforts while training, onboarding, and supporting new developers.
- Investigate, diagnose, and resolve system-level issues to ensure stability, performance, and reliability.

EDUCATION

Associates of Applied Science - Computer simulations & Game programming |
Gwinnett Technical College | Lawrenceville, GA - 2010 - 2015

CERTIFICATIONS

Oracle Java SE 8 Programmer I — 2026
